

**Session Title: Circular Economy**

**Name: Daniela Cristina Antelmi Pigosso**

**Position: Associate Professor, Department of Mechanical Engineering, Section of Engineering Design and Product Development, Technical University of Denmark**

Are you ready for a Circular Economy? In order to enable an effective decoupling of value creation from resource consumption, the transition to a Circular Economy requires systematic changes in key business processes. In this presentation, the eight key dimensions that are key to ensure an effective transition of companies to a Circular Economy will be discussed and illustrated through a number of success histories. The participants will be introduced to the MATChE platform, a self-assessment readiness tool that enables the mapping of strengths and opportunities for enhanced circularity, with a worldwide benchmarking with 70+ companies.
