Career history

Hiroyuki Tsutsumi has been in the IT industry for more than 30 years with management experience at global companies in Japan, Europe, US and Asia. He also has led operations in B2B, B2C and B2B2C, while devoting his energy to creating IoT (Internet of Thing) platforms and new business models.

In March 2017, Mr. Tsutsumi became President and CEO of Philips Japan and President of Philips Respironics. He leads Philips Japan which is embracing digitization and integrated solutions as a driving focus in the disruption of the current healthcare system.

At Samsung Japan Corporation where he served as the first Japanese President and CEO, he headed mobile phone business and networking business, especially made great efforts to promote Galaxy brand and the mobile terminal through strengthened marketing and PR activities, and to establish the next generation mobile networks.

At Cisco Systems Inc. he was in charge of development of the solution portfolio as the Vice President for Emerging Solution Partners Business Development in Asia Pacific, Japan and Greater China Region. Prior to this, he was engaged in service provider operations as Vice President in Cisco Systems GK in Japan.

Before Mr. Tsutsumi joined Cisco Systems he worked at NEC Corporation as Secretary to the President and Manager, and Senior Manager to develop overseas businesses including alliances and acquisitions. He is also committed to promoting and educating IoT and is invited to speak at Summits and Forums, as well as is a visiting lecturer at universities.

Mr. Tsutsumi obtained a Bachelor of Science for Mechanical Engineering at Keio University in Japan and completed Stanford Executive Program at Stanford University in the United States.
