

Session Title: Renewable Microgrid and Energy Access

Name: Shigeki (Sean) Miwa

Position: Representative Director & CEO, SB Energy Corp.

SB Energy is pursuing a strategy focused on integration of Bits (IT), Mobility (transportation system) and Watts (renewable energy), called “BMW” for short. The concept is to become a platformer and service provider at the intersection of these areas.

SB Energy has renewable energy plants in Japan, India and Mongolia, and is developing large-scale projects in India, Saudi Arabia, Africa and Mongolia. Also, it is promoting an international power grid connecting Northeast Asian countries (Asia Super Grid). It has a virtual power plant (VPP) business, which controls demand and supply of power by utilizing IoT technology and energy storage systems.
