

**Session Title: Decarbonisation by Industrial Sector**

**Name: Yukiko Araki**

**Position: Corporate Officer, Executive General Manager, Sustainability Promotion Division, Hitachi, Ltd.**

Hitachi develops its founder's credo, "Contribution to society through the development of superior, original technology and products", into "Social Innovation Business" today, which contributes to realize a sustainable society with improved quality of life.

Taking the global framework such as SDGs and Paris Agreement on climate change into account, Hitachi has announced "Hitachi Environmental Innovation 2050" in 2016. It sets a CO<sub>2</sub> emissions target to reduce 80% by 2050 throughout its value-chain by promoting de-carbonizing and digitalizing businesses. Hitachi also makes its best to disclose carbon related business risks and opportunities in its sustainability report annually.
