

Noriko Endo

Position/Department/Division/Institution/Organization

Project Professor
Graduate School of Media and Governance
Keio University

Country

Japan

Career history

She is currently Project Professor at Keio University, and lectures on environment and energy theory. In 2015, she started a research project concerning risk communication and public acceptance, and currently leads round table discussions with women leaders in the Japanese industrial world to address the issue of energy and environmental policy sustainable for future generations.

The Japanese government appointed her as a member of the Industrial Structure Council in July 2013, Fiscal System Council in March 2014, Advisory Committee for Natural Resources and Energy in May 2014, Special Committee on New Clear Compensation Scheme in April 2015, Space Policy Committee in July 2016, and Steering Committee of Nuclear Damage Compensation and Decommissioning Facilitation Corporation in March 2018.

She draws on her experience as a journalist with a career spanning nearly 20 years, and she served as Deputy Editor-in-Chief of an economic magazine, The Diamond Weekly (2006-2011). She obtained her Ph. D. in Energy Science at Kyoto University.
