

Session Title: Biorefinery

Name: Kiyohiko Igarashi

Position: Associate Professor, Forest Chemistry Laboratory, Department of Biomaterial Sciences, Graduate School of Agricultural and Life Sciences, The University of Tokyo

Abstract title: Overview of bioeconomy

“Bioeconomy” is the newest concept, and its goal is a more innovative and low-emissions economy, reconciling demands for sustainable agriculture and fisheries, food security, and the sustainable use of renewable biological resources for industrial purposes, while ensuring biodiversity and environmental protection. Therefore, the Bioeconomy apparently includes Biorefinery and has great impacts on governmental policies and social systems. In the present session, I will introduce the outline of Bioeconomy, and discuss its relationship to Biorefinery.
