

**Session Title: Smart Consumers**

**Name: Masakazu Shio**

**Position: Technical General Manager, External Relation Group, Housing Company,  
Sekisui Chemical Co., Ltd.**

The number of house installed PV is increasing based on a policy of Japan “Standardization of ZEH”.

When residents use both commercial electricity and self-generation of electricity, it becomes important to grasp energy budget of the whole house and to choose the most suitable energy in accord with the situation

Visualization of the energy budget by the HEMS, offer of the standard value to compare the home data, advice of the method to live smart.

To increase smart consumers with these suggestion leads to business expansion of our company.
