Career history

Nicolette Bartlett is the Director of Climate Change at CDP, formerly known as the Carbon Disclosure Project. CDP is an international not-for-profit organization providing the only global environmental disclosure system. In her role, Nicolette is responsible for ensuring CDP's climate change strategy is delivered; leads on the global climate change analysis and reports; and manages the team supporting the implementation of groundbreaking initiatives such as the Science Based Targets initiatives and RE100, and CDP's work on carbon pricing delivered as a partner of the Carbon Pricing Leadership Coalition.

Nicolette has been an author or reviewer for a number of publications, including the annual CDP report on Internal Carbon Pricing; Carbon Pricing Corridors: the Market View;, the business chapter in the 2016 New Climate Economy report, a series of summary reports for business of the IPCC 5th Assessment Report; as well as publications analysing the potential of collaborative initiatives to increase ambition reductions internationally.

Previously Nicolette was a Senior Programme Manager at the University of Cambridge Institute for Sustainability Leadership, leading on international climate policy projects; including the international engagement of The Prince of Wales's Corporate Leaders Group, developing a Green Growth Platform in Pacific Alliance countries, supporting the development of business groups on climate change and research analysing the role that non-state actors play in driving down emissions.
