

Session Title: Environmental Initiatives of Mitsubishi Electric Corporation

Name: Masaki Sakuyama

Position: Chairman, Mitsubishi Electric Corporation

Mitsubishi Electric endeavors to become a "global, leading green company," contributing to the realization of a prosperous society that simultaneously achieves sustainability, safety, security and comfort.

To contribute to environment, the company will promote technological development and businesses that lead to initiatives such as enhancing product energy saving and reducing greenhouse gasses from production, reducing and recycling waste plastic and using water effectively. The company will also contribute to achieving the SDGs targets by promoting these businesses globally.
