

Session Title: Cool Capitalism

Name: Hiro Mizuno

Position: Executive Managing Director and CIO, Government Pension Investment Fund (GPIF)

As a long-term investor and universal owner, GPIF believes that ESG is a critical factor, and we are committed to improve sustainability of the whole capital market, through the engagement with asset managers and index providers. We assume climate change is particularly crucial, since most of external asset managers GPIF entrusts regard it as a priority matter. In terms of GPIF's own investment and activities, we published ESG REPORT 2017 in August which includes the carbon footprint data from GPIF's portfolio, and have called for application of environmental indices that would challenge the global environmental issues.
