

Session Title: Mobility Transition

Name: Takeshi Uchiyamada

Position: Chairman of the Board of Directors, Toyota Motor Corporation

- Recently, there is great expectation on hydrogen, both as an energy source for a sustainable society, and as an energy carrier.
- In Japan, under the leadership of the government, various programs toward achieving a hydrogen-based society have been underway.
- Toyota has pioneered in introducing FCV “MIRAI” at 2014, which sold more than 6,600. Meanwhile, as for Toyota Group, we have conducting various activities.
- By actively participating in various projects including promoting deployment of hydrogen infrastructure or low-carbon hydrogen supply chain, Toyota intends to stand on the frontlines and lead the way in achieving a hydrogen-based society.
