

Session Title: Inclusive Action towards a Net-zero Emissions Future

Name: Pascal de Sain

Position: Vice President, DSM Advanced Solar

Abstract title: Purpose shaking hands with Performance; sustainable business in today's world.

Often, the general belief is that, as a company, you either focus on profit or on improving the world – but that you cannot do both. At DSM, we are convinced that for a company to address today's complex and interconnected challenges, good financial returns can – and must – go together with purpose. Building on our strong science base and capacity for innovation, together with our stakeholders, we are moving beyond compliance to enable sustainable and healthy solutions for our customers, to improve the impact of our own operations, and to advocate the creation of a sustainable business environment.
