

Pascal de Sain

Position/Department/Division/Institution/Organization

Vice President DSM Advanced Solar

Country

Netherland

Career history

After joining DSM in 1992 as a Process Engineer Ammonia Plants, Mr. Pascal de Sain has gone on to hold variety of key commercial and leadership positions with the company. He moved to the Materials cluster in 2006 and began a series of business management positions within DSM Resins & Functional Materials. At DSM Engineering Plastics since 2016, he played a key role in transforming the business from a regional business unit structure to a global business line by establishing the Performance Polymers business line. As Vice President of Advanced Solar, Pascal is working to democratize solar energy and to drive growth by expanding DSM's innovative product offering.
