Country

U.S.

Career history

Prior to joining ARC in December 2016, Mr. Braun had more than 34 years of experience in commercial nuclear power operations. He was most recently the President and Chief Nuclear Officer of PSEG Nuclear, following assignments as Chief Operating Officer and Site Vice President of the Salem Generating Station. Previously, Mr. Braun worked for many years with Exelon Corporation. His last position was Site Vice President of Exelon Corporation's Peach Bottom Atomic Power Station. Prior to his appointment at Peach Bottom, he was Vice President of Nuclear Oversight of Exelon's nuclear group and previously served as Plant Manager of the company's Limerick Generating Station, where he held a senior reactor operator license. Mr. Braun began his career at Limerick in 1982.

Mr. Braun has a Bachelor of Mechanical Engineering degree from Villanova University and received their Distinguished Alumni Award in 2013. Mr. Braun received an Honorary Doctorate in Engineering from the Rowan University College of Engineering in 2016.
