

Session Title: Green Urbanization

Name: Dolf Gielen

Position: Director of Innovation and Technology Centre, IRENA

Abstract Title: Global Energy Transformation 2050: the role of Cities

The world needs a global energy transformation to meet the Sustainable Development Goals. Cities have a key role as they account for the majority of global energy and resource consumption. IRENA has developed new strategies for cities how to transform their energy supply and use, with special emphasis on renewable energy and electrification of end use.
