

Samantha McCulloch

Position/Department/Division/Institution/Organization

Head of CCUS Unit, International Energy Agency

Country

France

Career history

Samantha is the Head of the CCUS Unit at the International Energy Agency in Paris. Her team provides leading analysis and insights on the development and deployment of carbon capture, utilisation and storage technologies. She is a lead author of several IEA publications including *2017 Energy Technology Perspectives*, *20 years of CCS: Accelerating future deployment*, and *5 keys to unlock CCS investment*. Prior to joining the IEA, Samantha was the Policy Director of the Australian Coal Association and also held various positions in the Australian Government, working on coal policy, energy market reform and energy security policy.

Areas of expertise

Carbon capture, utilisation and storage; Energy policy
